WOOTEN SCHOOL
OF ADMINISTRATION
OVER 40 YEARS OF EXPERIENCE

Who We Are?

Our team includes:

- **Felton Wooten, COO, Operations, Administrator, Preceptor & Educator**
- **Christopher Carrothers, CEO, Developer, General Contractor**
- **Kenneth "BIG" Blake, CFO, Funding, Business & Real Estate Strategies.**

Our combined experience provides valuable support to family care homes in Mecklenburg County and across the Carolinas.

What We Do?

1. Training Site for New Administrators

We are seeking partner facilities to serve as training sites for candidates completing the 100-hour internship/practicum required for administrator licensure in North Carolina. The process begins with the local county department of social services and the Adult Home Specialist, who works with the applicant and the state licensure process. Felton Wooten, as a state-approved preceptor, would oversee the training experience. Your facility would gain added support while helping mentor the next generation of care providers.

2. Management or Acquisition for Retiring Owners

If you are considering retirement or would like to reduce your day-to-day responsibilities, we would welcome the opportunity to discuss managing your home on your behalf or purchasing the company outright. North Carolina also has a formal change-of-ownership process for family care homes, so planning a smooth transition is important. Our goal is to preserve care quality, protect residents, and honor the legacy you have built.

3. Conversion or New Build Referrals

Do you know anyone interested in converting an existing home into a licensed family care home, or building a new one from the ground up? North Carolina family care home licensing involves coordination with the local county department of social services, zoning, construction review, and state licensure requirements. Our team can manage the full process, including property identification, construction, licensing preparation, and operational launch. Please have them contact us directly.
